Mission & Values

Our Mission – Creating opportunities and solutions with quality products and exceptional people

Our Values – Profitability the right way... Integrity, Accountability, Excellence

Primary Job Function:

Maintain an efficient, safe, stable, clean environment in accordance with company policies and procedures, standard practices and safety regulations. Operate primary and secondary crushing systems to crush and convey raw material to designated areas. Must be able to direct and delegate to employees assigned to the crusher.

Please see below a brief summary job description.

Essential Requirements:

- Wear required safety equipment including but not limited to hardhats, safety glasses, safety harness, ear plugs, dust masks and gloves
- Physically capable of climbing up and down, above, inside and under equipment
- Able to perform shoveling
- Capable of doing repetitious arm, hand and leg motion
- Stand or sit for considerable amounts of time
- Lift up to 80 pounds safely
- Must be able to work various schedules including overtime, holidays, call outs and weekends as needed
- Work in inclement weather when required or as assigned
- Required and predictable attendance

Knowledge, Skills and Abilities:

- Three to five years experience in aggregates industry preferred
- Experience in the washing or crushing of materials preferred
- Willing to relocate with company equipment
- Able to multi-task and make decisions under pressure
- Possess steel toed shoes and hand tools per the Aggregate tool list
- Must be able to read, write and communicate clearly for documentation and customer relations

Duties and Responsibilities:

- Know and follow company safety procedures and policies with or without supervision
- Follow Company policies and procedures
- Operate equipment in a safe manner
- Complete Pre/Post Inspection sheet daily
- Start up and shut down equipment in proper sequence per safety instructions
- Observe operation of crushing equipment and flow of material through system
- Direct unloading of aggregate haulage trucks at the crusher
- Direct labor crew when necessary
- Feed material into jaw crusher at proper rate for best crushing results
- Inspect equipment and check lube system as directed
- Start and stop sampling cutter as necessary
- Maintain flow of material through crushing and conveying system
- Finish raw bays to the specific targets as directed by Supervisor or Quality Manager
- Direct crusher loader operator to mix and attend surge piles as required
