Mission & Values

Our Mission – Creating opportunities and solutions with quality products and exceptional people

Our Values – Profitability the right way... Integrity, Accountability, Excellence

Primary Job Function:

Manage environmental programs and regulatory reporting requirements to maintain compliance with federal, state, and local environmental laws and regulations as well as company environmental policies and procedures at aggregate facilities. Coordinate with operations and maintenance management teams to ensure routine activities are consistent with environmental requirements. This position reports to the Sr. Director, Cement Operations and Environmental.

Please see below a brief summary job description.

Essential Requirements:

- Wear required safety equipment including but not limited to hardhats, safety glasses, safety harness, ear plugs, dust masks, and gloves
- Able to ascend and descend steps, stairways, ladders, inclined and declined surfaces, and work in confined spaces
- Required and predictable attendance
- Maintain a valid driver license and acceptable driving record

Knowledge, Skills and Abilities:

- College Degree in Environmental Science, Engineering, or related studies
- Ten years of industrial experience preferred
- Knowledge of the aggregates processing and related industries preferred
- Computer literate with working knowledge of Microsoft Word and Excel
- Working knowledge of Microsoft Power Point and Auto Cad or Auto Cad LT preferred
- Effectively meet deadlines
- Required travel to various sites
- Excellent verbal and written communication skills
- Self-starting individual capable of following projects through to completion

Duties and Responsibilities:

- Manage and prioritize work related to development and implementation of environmental programs and regulatory reporting requirements to maintain compliance with federal, state, and local environmental laws and regulations as well as company policies and procedures at company facilities
- Manage Environmental Department budget and mentor department staff including environmental engineers, coordinators, and technicians
- Manage development and implementation of Environmental Management System
- Manage the development and maintenance of environmental plans and procedures for monitoring emissions and reporting of emissions and/or data to comply with the conditions of the Company's environmental permit(s) and other requirements of local, state, and federal regulations
- Position the company for environmental leadership and recognition through participation in industry associations and public environmental management opportunities
